

# PORTABLE ACCESS CONTROL ENFORCEMENT

This operational setup requires all employees and visitors to pass through a screening area, such as a check-in tent, before entering.

1. Temperatures of those screened will be taken & recorded. Cardholders/visitors with elevated temperatures will not be allowed access into the facility.
2. Those that are pass screening will have free access according to their assigned access group(s).
3. At midnight, all cardholders who were allowed access that day will be reset to 'Unknown Status' thereby forcing another screening to enter the following day using the same procedure.
